

Quality Policy

At InfiMotion Technology, we are dedicated to developing, manufacturing, and delivering high-performance Electric Drive Units (EDUs) for fully electric and hybrid electric vehicles. Our commitment spans the entire value chain, from EDU components to advanced software solutions, ensuring that we meet the evolving demands of the automotive industry and contribute to a sustainable future.

Integrity, fairness, and mutual respect are the cornerstones of our business philosophy. We take full responsibility for the future of InfiMotion by adhering to all applicable laws and regulations, ensuring that our business practices are ethical and transparent. Our fundamental values guide us toward a future where we grow together with our business partners, employees, and customers.

This Quality Policy communicates our commitment to fulfilling the relevant requirements as well as our continuous improvement work.

Specifically, for us it is about focusing on:

- Meeting customer requirements, needs and expectations by delivering fully functional services and products.
- Ensuring high delivery precision of products and deliverables according to plan and agreement.
- Using state of the art technologies within our business sector.
- Managing suppliers and external parties, to create security within the entire supply chain.
- Complying with all legal and other binding requirements.
- Constantly working towards improvements to reach even higher quality performance and responsiveness in line with our quality management system
- Building a strong team culture that promotes collaboration and that utilizes and values our competences and differences.
